Outlook for the fiscal period ending February 28, 2018

i) Outlook for overall operations

In terms of the outlook for the rental office market, continuing favorable conditions are expected, resulting from needs such as increased floor space in corporate offices. In the real estate selling market, the transaction prices for property are projected to continue at high levels amid the continuing favorable fund procurement conditions, etc., resulting from low interest rates.

Against this backdrop, the Investment Corporation will focus on Tokyo Commercial Properties (Note 1), aiming to maximize unitholder value over the medium to long term, and invest in Next-Generation Assets (Note 2), aiming to support stable earnings over the long term. As part of these efforts to maximize investor value over the medium to long term, the Investment Corporation will implement efforts combining the Asset Manager's own measures to drive external and internal growth while using the support of the Hulic Group. The Investment Corporation will maintain and grow profits over the medium to long term and increase the size and value of the asset portfolio.

In terms of financing strategy, the Investment Corporation will seek to maintain the LTV ratio at an appropriate level and shift to longer loan-terms with fixed interest rates and staggered repayment dates in order to maintain a stable and healthy financial position.

(Note 1) "Tokyo Commercial Properties" are office properties and retail properties under a concept specific to the Investment Corporation that comprehensively includes properties consistent with the basic philosophy of the Investment Corporation. Specifically, office properties are those in Tokyo's 23 wards that are in principle located within a five-minute walking distance from the nearest train station, in areas where the office properties are sufficiently competitive. Retail properties are those located in the Tokyo metropolitan area and major cities in the surrounding area that are in principle located within a five-minute walking distance from the nearest train station or in areas with a high concentration of retail activities. Such retail

properties are also highly visible in public and have the potential to generate demand from prospective tenants that offer products and services suitable for the characteristics of their respective retail areas.

(Note 2) “Next-Generation Assets” are properties specified for investment by the Investment Corporation based on its basic philosophy. Specifically, they are lease properties for which the Investment Corporation estimates there will be continuing firm demand going forward based on society’s growing needs and for which, in principle, a long-term lease agreement be concluded with a single business tenant. At present, the Investment Corporation classifies private nursing homes, network centers and hotels as Next-Generation Assets. The Investment Corporation may broaden or change the scope of its Next-Generation Assets if it judges that the societal needs will grow or that there will be firm demand in the future.

Assumptions for forecasts of performance for the fiscal period ending February 28, 2018 (from September 1, 2017 to February 28, 2018) and the fiscal period ending August 31, 2018 (from March 1, 2018 to August 31, 2018)

Item	Assumptions
Accounting period	<ul style="list-style-type: none"> • Fiscal period ending February 28, 2018: 181 days from September 1, 2017 to February 28, 2018 • Fiscal period ending August 31, 2018: 184 days from March 1, 2018 to August 31, 2018
Portfolio	<ul style="list-style-type: none"> • We have based our assumptions on a total of 45 properties consisting of 43 properties we hold as of the date of this report (hereinafter referred to as the “Assets Held” in this table of assumptions) in addition to the Assets Planned for Acquisition, and on consideration of quasi co-ownership interest to be transferred in the Assets Planned for Transfer. • Concerning the Assets Planned for Transfer, we plan to transfer the quasi co-ownership interest of 55% in the fiscal period ending February 28, 2018 (the eighth fiscal period) (hereinafter referred to in this “Assumptions” column as the “Eighth Fiscal Period Transfer”), the quasi co-ownership interest of 30% in the fiscal period ending August 31, 2018 (the ninth fiscal period) and subsequently the quasi co-ownership interest of 15%. • In our forecasts of performance, we have assumed that there will be no changes in the composition of our portfolio (no acquisitions of new properties and no transfers of Assets Held) excluding above until August 31, 2018 (the end of the ninth fiscal period). • There may be changes in the portfolio, however, caused by buying or selling of properties.
Operating revenues	<ul style="list-style-type: none"> • Real estate lease business revenues from Assets Held have been calculated in consideration of trends of the lease market and other factors on the basis of lease agreements effective as of the date of this report. Real estate lease business revenues from Assets Planned for Acquisition have been calculated in consideration of trends of the lease market and other factors on the basis of information provided primarily by the owner and lease agreements scheduled to be effective as of the scheduled date of acquisition for the Assets Planned for Acquisition, and the real estate lease business revenues from the Assets Planned for Transfer reflect the decreases of the quasi co-ownership interest on the assumption that the transfers of the quasi co-ownership interest are carried out as planned. • Projected amount for a gain on transfer relating to the Assets Planned for Transfer (after deducting expenses relating to the transfer) is recognized for the fiscal period ending February 28, 2018 (the eighth fiscal period) and the fiscal period ending August 31, 2018 (the ninth fiscal period). • Operating revenues assume no delinquencies or non-payment of rent by tenants.

Item	Assumptions
Operating expenses	<ul style="list-style-type: none"> • Of the expenses related to rent business, the principal component of operating expenses, expenses other than depreciation and amortization expenses for the Assets Held (excluding the 6 properties of assets acquired in the seventh fiscal period (hereinafter referred to as “Acquired Assets for the Seventh Fiscal Period”)) have been calculated in such a way as to reflect variable factors in the expenses on the basis of past performance figures. In addition, such expenses for the Acquired Assets for the Seventh Fiscal Period and Assets Planned for Acquisition have been calculated in such a way as to reflect variable factors in the expenses based on information received from the transferors of the assets and others, and also based on past performance figures. • We have calculated depreciation and amortization expenses using the straight-line method, including ancillary expenses, and assumed that we will incur depreciation and amortization expenses of ¥793 million for the fiscal period ending February 28, 2018 (the eighth fiscal period) and ¥820 million for the fiscal period ending August 31, 2018 (the ninth fiscal period). • In general, fixed asset tax, city planning tax, etc. for the assets we acquire or transfer are settled at the time of acquisition or transfer between the transferor and the transferee based on their respective periods of ownership in relation to the relevant tax year. With respect to the acquired assets, any of these taxes allocated to the transferee are not recognized in expenses at the time of acquisition because they are treated as a part of the acquisition cost for accounting purposes in the Investment Corporation. For the Assets Planned for Acquisition to be acquired by the Investment Corporation during the fiscal period ending February 28, 2018 (the eighth fiscal period), fixed asset tax, city planning tax, etc. will be recognized as expenses from the fiscal period ending August 31, 2018 (the ninth fiscal period), and not yet in the fiscal period ending February 28, 2018 (the eighth fiscal period). Fixed asset tax, city planning tax, etc. are assumed at ¥532 million for the fiscal period ending February 28, 2018 (the eighth fiscal period) and ¥617 million for the fiscal period ending August 31, 2018 (the ninth fiscal period). • Repair expenses for buildings are recognized for each fiscal period in amounts assumed as necessary based on the repair plan formulated by the Asset Manager (Hulic Reit Management Co., Ltd.) for each property. However, actual repair expenses for each fiscal period may differ substantially from our forecasts, mainly for the following reasons: (i) we may incur expenses for urgent repairs to properties for reasons including damage to buildings resulting from factors that are difficult to foresee, (ii) generally, there is a substantial difference in such expenses incurred from one fiscal period to another, and (iii) such expenses are not incurred on a regular basis.
Non-operating expenses	<ul style="list-style-type: none"> • We expect to record interest expenses and other borrowing-related expenses of ¥492 million in the fiscal period ending February 28, 2018 (the eighth fiscal period) and ¥498 million in the fiscal period ending August 31, 2018 (the ninth fiscal period). • We expect to record amortization of investment corporation bond issuance costs (amortized by the straight-line method over period until redemption) and amortization of investment unit issuance costs (amortized by the straight-line method over a three-year period) relating to issuance of investment corporation bonds and new investment units, etc. of ¥29 million in the fiscal period ending February 28, 2018 (the eighth fiscal period) and ¥29 million in the fiscal period ending August 31, 2018 (the ninth fiscal period).

Item	Assumptions
Interest-bearing debt	<ul style="list-style-type: none"> • The balance of interest-bearing debt of the Investment Corporation as of the date of this report is ¥115,850 million (comprising ¥3,960 million in short-term loans payable, ¥106,890 million in long-term loans payable and ¥5,000 million in investment corporation bonds). • Although a new loan of ¥5,000 million in short-term loans payable is scheduled to be made accompanying the acquisition of the Assets Planned for Acquisition, (hereinafter referred to as the “Bridge Loan”), the amount of the Bridge Loan may change depending on the final issue value of the new investment unit issuance through public offering resolved by the Investment Corporation’s Board of Directors meeting held on the date of this report (hereinafter referred to as the “Public Offering”). We plan to repay the Bridge Loan with the proceeds of the Eighth Fiscal Period Transfer of the Assets Planned for Transfer and the proceeds of the issuance of new investment units through third-party allotment resolved by the Investment Corporation’s Board of Directors meeting held on the date of this report (hereinafter referred to as the “Third-Party Allotment”). • For ¥3,960 million in short-term loans payable (excluding the Bridge Loan) for which repayment is due by August 31, 2018 (at the end of the ninth fiscal period) we assume the refinancing of the entire amounts at the time of the due date. • As a result of the above, we assume that the balance of interest-bearing debt as of each of February 28, 2018 (at the end of the eighth fiscal period), and August 31, 2018 (at the end of the ninth fiscal period), will be ¥115,850 million. • We have assumed LTV ratio of approximately 42.0% as of February 28, 2018 (at the end of the eighth fiscal period). • The LTV ratio was obtained by the following formula: $\text{LTV} = \frac{\text{Interest-bearing debt at end of period (projected amount)}}{\text{Total assets at end of period (projected amount)}} \times 100$ <p style="margin-left: 40px;">Total assets at end of period (projected amount) =</p> <p style="margin-left: 40px;">The amount is calculated by adding the total assets as shown on the balance sheet as of August 31, 2017 (at the end of the seventh fiscal period) (¥264,657 million) and total planned acquisition price of Assets Planned for Acquisition (¥15,250 million), and subtracting the transfer proceeds of the Eighth Fiscal Period Transfer (excluding the gain on transfer) (¥6,471 million), adding the gain on transfer related to the Eighth Fiscal Period Transfer, and adding the remaining amount (¥1,970 million) of the transfer proceeds of the Eighth Fiscal Period Transfer (excluding the gain on transfer) after deducting the portion of transfer proceeds of the Eighth Fiscal Period Transfer to be used to repay the Bridge Loan.</p>
Issuance of investment units	<ul style="list-style-type: none"> • We have assumed that in addition to the 1,045,000 total investment units issued as of the date of this report, the entire total of 65,000 units that are planned to be newly issued will be issued. This includes the Public Offering (61,800 units) and the Third Party Allotment (maximum of 3,200 units). • Other than the above, we have assumed there will be no issuance of additional investment units until the end of the fiscal period ending August 31, 2018 (the ninth fiscal period).
Distributions per unit (excluding distributions in excess of earnings)	<ul style="list-style-type: none"> • We have calculated distributions per unit (excluding distributions in excess of earnings) in accordance with the cash distribution policy prescribed in the Investment Corporation’s Articles of Incorporation. • Actual distributions per unit (excluding distributions in excess of earnings) may fluctuate due to various factors including changes in the asset portfolio, fluctuations in rent revenues associated with changes in tenants, or unforeseen occurrence of repairs.
Distributions in excess of earnings per unit	<ul style="list-style-type: none"> • We currently have no plans to pay cash distributions in excess of earnings (regarding distributions in excess of earnings per unit).

Notes on Financial Instruments (unaudited)

1. Matters regarding status of financial instruments

(1) Policy for handling financial instruments

The Investment Corporation procures funds for acquisition of assets, repairs and repayment of debt primarily through borrowings from financial institutions, issuance of investment corporation bonds and issuance of investment units. In procuring interest-bearing debt, the Investment Corporation takes into account a balance between flexibility in procurement of funds and financial stability.

Furthermore, the Investment Corporation conducts derivative transactions only for the purpose of hedging fluctuation risk of interest rates for borrowings and does not conduct any speculative transactions.

(2) Description of financial instruments and associated risks, and risk management structure

Deposits are used for investment of our surplus funds. These deposits are exposed to credit risk such as bankruptcy of the depository financial institutions. Deposits are carried out with safety and redeemability taken into consideration and are limited to those with short-term deposit periods.

Borrowings and investment corporation bonds are mainly for the purpose of acquiring properties and refinancing of existing borrowings. Of these, borrowings with floating interest rates are exposed to interest rate fluctuation risk. To avoid this fluctuation risk, the Investment Corporation uses derivative transactions (interest rate swaps) as hedging instruments, which, in effect, converts fluctuating interest rates into fixed interest rates.

For the method of hedge accounting, hedging instruments and hedged items, hedging policy and the method of assessing hedge effectiveness, please refer to "4. Method of hedge accounting" in "(7) Notes on Significant Accounting Policies" above.

(3) Supplemental explanation on matters regarding fair values, etc. of financial instruments

The fair values of financial instruments are based on market prices, if available. If there is no available market price for certain financial instruments, such fair value is based on the value rationally measured. Since variables are factored into measurements of fair value, the value may vary if different assumptions are used. The contract amounts related to derivatives mentioned in “Notes on Derivative Transactions” below should not be considered indicative of the market risk associated with the derivative transactions.

(Note 1) Measurement of fair values of financial instruments and matters regarding derivative transactions

Assets

(1) Cash and deposits, and (2) Cash and deposits in trust

The book value is used as the fair value of these assets, given that the fair value is almost equivalent to the amount of the book value, as they are settled in a short time.

Liabilities

(1) Short-term loans payable

The book value is used as the fair value of these liabilities, given that the fair value is almost equivalent to the amount of the book value, as they are settled in a short time and carry floating interest rates.

(2) Investment corporation bonds

Fair value has been calculated on the basis of reference quotations of sales-purchase transactions and other such data, as provided by financial institutions and other such entities.

(3) Long-term loans payable

Since long-term loans payable that carry floating interest rates are reviewed on a short-term interval to reflect market interest rates, and the Investment Corporation's credit standing did not change significantly after the execution of loans, their fair value is considered approximate to the book value. Therefore, the book value is used as the fair value of these liabilities (however, for long-term loans payable with floating interest rates to which special treatment for interest rate swaps is applied (please refer to "Notes on Derivative Transactions" below), the fair value is calculated by discounting the sum of principal and interest, which are treated in combination with such interest rate swap, at a reasonable rate estimated for a similar new loan that is made corresponding to the remaining period).

The fair value of long-term loans payable carrying fixed interest rates is calculated by discounting the sum of principal and interest at a reasonable rate estimated for a similar new loan that is made corresponding to the remaining period.

- (Note 1) *Date of construction* represents the date of construction as described in the property registry. Date of construction is omitted in case of holding of land only.
- (Note 2) *Total contracted rent* is calculated by multiplying the monthly contracted rent (limited to rent for room, including common service fee and excluding consumption taxes and usage fee for warehouses, signboards and parking lots, regardless of free rent arrangements in effect as of August 31, 2017) for buildings as indicated in the relevant lease agreement of each asset held as of August 31, 2017 by 12 (with respect to assets held subject to multiple lease agreements, the aggregate monthly rent for all lease agreements) and rounding to the nearest million yen. For properties for which we acquired only land, it is calculated by multiplying the monthly contracted rent (excluding consumption taxes) as indicated in the lease agreement for such land as of August 31, 2017 by 12 and rounding to the nearest million yen. For Sotetsu Fresa Inn Ginza 7 Chome (Land), the Investment Corporation entered into a co-ownership agreement regarding use of co-owned land for the granting of land use rights to the co-owner (hereinafter “Co-ownership Agreement”) with the co-owner of the property, Hulic Co., Ltd., which owns 50% co-ownership interest in the land and owns the building, and the amount (nontaxable) is calculated on an annual basis by multiplying the monthly land usage fee (excluding consumption taxes) for permission to use the land based on the Co-ownership Agreement by 12 and rounding to the nearest million yen. When a master lease agreement has been concluded for the asset held, the amounts provided are the amount for the portion corresponding to the pass-through master lease under which rents are directly received from end-tenants in principle (hereinafter referred to as the “Pass-through Master Lease Agreement”), calculated on an annual basis by multiplying the monthly rent as indicated in each sublease agreement entered into with end-tenants corresponding to that portion by 12; and the amount for the portion corresponding to the fixed-type master lease under which a certain amount of rent is received regardless of fluctuations in rents for end-tenants (hereinafter referred to as the “Fixed-type Master Lease Agreement”), calculated on an annual basis by multiplying the monthly rent as indicated by the Fixed-type Master Lease Agreement corresponding to that portion by 12.
- (Note 3) *Leasehold/security deposits* indicates the aggregate of the recognized book values for the leasehold and/or security deposit(s) of each asset held as of August 31, 2017, rounded to the nearest million yen. For Sotetsu Fresa Inn Ginza 7 Chome (Land), the total amount of leasehold and similar deposits for the license to use land pursuant to the Co-ownership Agreement is rounded to the nearest million yen. For Gate City Ohsaki, leasehold/security deposit figures are not presented because such funds are not received by the Investment Corporation, but rather the master lease companies take custody of such funds as per contractual agreement with those companies.
- (Note 4) *Total leased area* is equivalent to total floor area of leased space set out in the relevant lease agreements of each asset held as of August 31, 2017. For the portion for which there is a Pass-through Master Lease Agreement, the actual total area leased under each sublease agreement entered into with end-tenants corresponding to that portion is provided; and for the portion for which there is a Fixed-type Master Lease Agreement, the total area corresponding to that portion is provided. For the property of which ownership is only for land, the area of the land is provided (or, in the case of co-owned land, the area described in the property registry multiplied by the co-ownership interest share).
- (Note 5) *Total leasable area* is equivalent to gross leasable space, based on the lease agreements or floor plans of buildings of each asset held as of August 31, 2017. With respect to properties of which ownership is only for land, total leasable area is the leasable area of the land as described in the applicable land lease agreements or land plans (or, in the case of co-owned land, the leasable area as described in the property registry multiplied by the co-ownership interest share).
- (Note 6) *Occupancy rate* is calculated by dividing total leased area by total leasable area of each asset held as of August 31, 2017, and is rounded to the nearest tenth. Subtotals, totals and total of the portfolio show the proportion of the total leased area to the total of leasable area for the assets held, rounded to the nearest tenth.
- (Note 7) For Hulic Kamiyacho Building, total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the quasi-co-ownership interest of property held by the Investment Corporation (70.0%).
- (Note 8) For Toranomom First Garden, total leasable area shows figures equivalent to the Investment Corporation’s partial ownership in the building (including some of co-ownership portion). (For the co-ownership portion, the figures calculated on a pro-rata basis in accordance with the co-ownership interests owned by the Investment Corporation are listed.) On the other hand, a master lease is served on the whole building together with the exclusively owned portions owned by other unit owners, and as income and expenditure of the property is allocated according to the ratio of ownership interest of the partial ownership rights owned by each unit owner, the figure shown for occupancy rate is that of the entire building. Total leased area, total contracted rent and leasehold/security deposits show amounts equivalent to the proportional share of the partial ownership in the building held by the Investment Corporation (approximately 81.4%).
- (Note 9) For Rapiros Roppongi, total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the Investment Corporation’s partial ownership in the building (including some of co-ownership portion). (For the co-ownership portion, the figures calculated on a pro-rata basis in accordance with the co-ownership interests owned by the Investment Corporation are listed.)
- (Note 10) For Ochanomizu Sola City, total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the quasi-co-ownership interest of property held by the Investment Corporation (21.7%).
- (Note 11) For Sasazuka South Building, total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the Investment Corporation’s partial ownership in the building.
- (Note 12) For Tokyo Nishi Ikebukuro Building, total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the Investment Corporation’s partial ownership in the building (including some of co-ownership portion).

- (Note 13) For Gate City Ohsaki, total leased area, total leasable area and occupancy rate show figures equivalent to the Investment Corporation's partial ownership in the property (Office space on the 8th floor of the West Tower office and commercial building: approximately 83.0% co-ownership interest of 4,088.37 m²; retail space from the 1st basement floor to the 3rd floor of the office and commercial building: approximately 2.4% co-ownership interest of 5,609.05 m²; residential building: 6 residential units of 308.20 m²) under the lease agreements with master lease companies. Total contracted rent shows amounts calculated with the rent and common service fees received by the master lease company for the month of August 2017 (excluding consumption taxes) multiplied by 12, with the result rounded to the nearest million yen. Leasehold/security deposit figures are not presented because such funds are not received by the Investment Corporation, but rather the master lease companies take custody of such funds as per contractual agreement with those companies.
- (Note 14) For Oimachi Redevelopment Building (#1), total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the Investment Corporation's co-ownership interest (approximately 82.6%) in partial ownership in the building.
- (Note 15) For HULIC & New SHIBUYA, total leased area, total leasable area, occupancy rate, total contracted rent and leasehold/security deposits show figures equivalent to the quasi-co-ownership interest of property held by the Investment Corporation (50.0%).
- (Note 16) The Investment Corporation has not obtained permission from the end-tenant or other relevant party of these properties to disclose the relevant information.
- (Note 17) In the above table, *Total contracted rent*, *Leasehold/Security deposits*, *Total leased area* and *Occupancy rate* may include information related to lease agreements that have been subsequently terminated, lease agreements for which we have subsequently received a request for termination or lease agreements for which rent payment is delinquent, if the lease agreement was valid as of August 31, 2017.

D: Daiwa Real Estate Appraisal Co., Ltd.

N: Japan Real Estate Institute

C: CBRE K.K.

T: The Tanizawa Sōgō Appraisal Co., Ltd.

(Note 2) *Acquisition price* represents trading value stipulated in each beneficiary right sales agreement in relation to the assets held, rounded to the nearest million yen. The trading value does not include consumption tax, local consumption tax and expenses incurred on acquisition.

(Note 3) *Book value at end of period* represents book value for each property less depreciation expenses as of August 31, 2017, rounded down to the nearest million yen.

(Note 4) *Appraisal value* represents the appraisal value as of the valuation date of August 31, 2017.

(Note 5) For Hulic Kudan Building (Land), Leaf Minatomirai (Land) and Sotetsu Fresa Inn Ginza 7 Chome (Land), this item was not provided due to the Investment Corporation only holding the land.

(Note 6) The direct capitalization method, which assumes there will be perpetual returns, has not been applied because the net cash flow based on income from rent has a definite period (it is assumed the land will be restored to a vacant lot after the land leasing period is over).

(Note 7) The terminal capitalization rate is not indicated because it is assumed to be restored to a vacant lot after the land leasing period is over.
